PROGRAM DESCRIPTION

This virtual course is intended to provide persons involved in delivering clinical education in all health care disciplines with a series of skills and tools for enhancing the effectiveness of the clinical education process. The course consists of two parts: 1) Didactic instruction via an interactive course format via Zoom and, 2) A six station self-scored Assessment Center that allows participants the opportunity to demonstrate knowledge and skills obtained through the course. The course addresses the knowledge and skills outlined in the APTA Guidelines for Clinical Instructors (endorsed by the APTA House of Delegates in June 1993 and revised in 1999).

The six modules of the course address issues related to:

- Planning and preparing for the clinical education experience.
- Assessing the level of learning and developing learning experiences in the clinic.
- Implementing effective teaching strategies in the clinical environment.
- Developing skills of performance evaluation.
- Identifying legal implications for clinical educators.
- Identifying and managing students with exceptional situations

Attendance at all course sessions and successful completion of the Assessment Center results in recognition by the APTA as a Credentialed Clinical Instructor.
You must attend all sessions and complete all assessment centers to be eligible for Credentialed Clinical Instructor status.
